Area Students Will Take JCOWA N.Y., Wash. Tour

The Dayton area Junior Council on World Affairs is sponsoring a tour of Washington D.C. and New York City, April 2-8.

Each year, JCOWA concentrates its study on one area of the world. This year, the group is studying Africa. The tour has been designed with respect to this study.

While in Washington, the members of JCOWA will tour African embassies and confer with various state department officials.

In New York, the members of JCOWA will tour the United Nations. There will be conferences with United Nations representatives. The members will also visit several companies which manufacture products sold to Africa.

To qualify for the trip each year, a pupil must be an active member of JCOWA. The \$63 cost includes transportation by chartered bus, and lodging.

Fairview will have ten representatives participating. They are Carole Remick, Daphne Cobb, Murray Horwitz, Jeri

Feuer, and Carole Kehl. Also participating are Bonnie and Andi Mazer, Carol Scherer, Bob Nagler, and Roberta Einhorn. Cindy Moeller, Helene Kasavan, Jeff Shaman, and Chris Matthews are alternatives for the trip.

Mr. George Catterlin, world history teacher, will be one of the chaperons for the JCOWA tour. He is the only chaperon from Fairview. There will be sixteen other chaperons.

Adelphi Will Sponsor Dance At Wampers

With thoughts of spring in mind, the girls of Adelphi will present the annual May Dance, April 29.

From 9-12 p. m. at Wampler's Backdoor, Karl Taylor's orchestra will provide music for the affair.

The cost is \$2.50 per couple. Dress will be semi-formal.

For the first time, the May Queen will be crowned and the court presented at the dance.

Helping with preparations for the event is Mrs. Melva Gorham, math teacher.

Saxophonist Will Highlight Symphonic Band Concert

Dr. Cecil Leeson, famous saxophone soloist, will be the Soloist for the 1966 Fairview Symphonic Band Concert to be held in the FHS auditorium, Friday, April 22, at 8:00 p.m.

Mr. Leeson has appeared with such organizations as the New York Philharmonic, the Boston Symphony, and the Chicago Symphony Orchestras; the four major United States Service Bands (Army, Marine, Navy, and Air Force) as well as at every major music clinic so recognized in the United States.

For the past four years,

Ticket sales will benefit the above unit members by paying toward each individual's 12th Annual Fairview Band Camp fee. For each ticket sold, the prospective camper will have one dollar paid towards his or her camp fee.

For those students purchasing tickets, a dance will be held in the gym following the concert honoring the participating musicians, twirlers, and dancers.

Admission will be one dollar.

Students Display Science Exhibits

In a continuing effort to be of service to education in Ohio, The Ohio Science Education Association will present "Project: Honoring The Science Scholar." It will be held, for the fourth year, April 2, at Miami University.

The affair includes projects from students grades 9 through 12 in such fields as chemistry, botany, mathematics, and physics. Judging will be based on ratings of satisfactory, excellent, and superior.

Those students receiving a superior rating will display their projects at State Science Day, April 15-16, in Columbus.

Under the supervision of Mr. Howard Schumacher, physics teacher, junior Terry Krumm and senior Dave Hardesty will enter projects.

Terry's project is a computer which is capable of measuring accurately areas of any shape. The method used is an indirect one. It involves a beam of light scanning rapidly across the unknown area. The computer is based on the principle that the components of a large group are in the same proportion as the components of a random sample from that group.

David's project is on communications through plasmas. He decided on this project upon hearing of the research that is being done in this field in astronautics. When a Gemini capsule re-enters the atmosphere, communications are blacked out due to an enveloped ionized layer or plasma. Gas that flows into an enclosed electric arc from the sides and out through an axial perforation in one of the electrodes emerges as a jet of high temperature plasma, a mixture of ionized particles hotter than the surface of the sun. At this temperature practically all the gas molecules are broken apart and they lose one or more electrons.

David's plasma generator consists of two major parts; an electric arc and a cooling system for the arc. The fuel of the generator is helium, which flows around a carbon rod which is supported vertically in the center of the doughnut shaped water cooling system. This and another carbon rod form the arc where the helium is ionized.

The power for the arc is an arc-welding generator. The current consumed at cont. page 4

Janet Kitzes, Loretta Shaffer, David Taylor, and Ed Kress peering intently into wings.

Class Of '67 Stages

The Curious Savage

The class of '67 will present its first production, "The Curious Savage" tonight. The play will begin at 8:00 p.m. in the auditorium at Fairview High School.

The Junior Play is the main fund raising project for the Junior-Senior prom. The price is \$1.00 per ticket.

Students Attend Contest, Apr. 16

The State Music Finals for Solos and Ensembles is scheduled for April 16.

Kent State University, Muskingum College, Lima Senior High, and FHS will host the contest.

To participate in the vocal division of the State Contest students must have received at least a superior rating in the District Solo Contest. This contest was at Beavercreek High School on March 5.

Pam Day, Shirley Close, Cathy Wenclewicz, Betsy Lippitt and Mike Tsocaris will represent FHS in the State Contest.

Pam Day, Shirley Close, and Cathy Wenclewicz are mezzo-sopranos who received superior ratings in the District State Contest; consequently, they are eligible for the state contest.

Betsy Lippitt received a superior on the violin and Mike Tsocaris took the same honor as a baritone soloist.

On April 30, FHS will host the State Final for Band and Choruses. Bands and Choruses in class "C" schools, small high schools in the state, will meet at Fairview.

"The Curious Savage" is not the age-old tale of the eternal triangle. It tactfully tells of people in an insane-asylum and those associated with them on the "outside".

Dave Bondor, Craig Subler, and Janan King portray Titus, Samuel, and Lily Belle, respectively. These people have their mother, Mrs. Savage, played by Dee Dee Shank, committed to an asylum. By so doing, they expect to obtain the estate that their deceased father left to their mother.

The cast consists of the "inmates" Florence, Hannibal, Fairy May, Jeff, and Mrs. Paddy. Loretta Shaffer portrays Florence, Ed Kress the part of Hannibal, Janet Kitzes plays Fairy May, Dave Taylor is Jeff, and Patti Ruppert plays Mrs. Paddy.

Robert (Gus) Shanower plays Dr. Emmett, the director of the institute and Debbie Oakes is Miss Wiley, the nurse.

The play is under the direction of Mr. Marshall Rosensweet, dramatics and speech teacher. Jackie Merritt is student director.

Staff States Policy

In response to the many questions posed to the members of the Tower News staff, we should like to take this opportunity to clarify the policy of our publication.

The primary purpose of a high school paper is to "sell the school". In keeping with this, the Tower News reports news of sports, club activities, and academic events, and publicizes achievements and distinctions of individual students. We function as a service to the school and the community.

The publication of the Tower News provides the opportunity for staff members to acquire a foundation of the basic principles of journalism. In accordance with this, we attempt to maintain the highest possible journalistic standards. We do not wish to sacrifice these standards merely to sell a few more papers.

It is our hope that students will understand and appreciate our position, and that they will continue to support the Tower News.

People Deserve Courtesy

Common courtesy, these days, is becoming more and more scarce. The attitudes and feelings of man toward his fellow men are very harsh. Tolerance and understanding are seemingly unheard of terms.

People always seem to be in "bad moods". They have an "it's none of my business" attitude toward their fellow human beings. Things irritate them. They don't like this - they don't like that. Most of these people like very little at all.

The giving of a friendly smile or a friendly "How are you?" really can't hurt anybody. Actually, little things like these can be very constructive, and can make a person feel just a little bit more like living life, rather than making everything he does a chore.

Common courtesy - if all of us would exercise it, our lives, our school, and everything around us would be made just a little bit more pleasant.

Support Patrons of Tower News

Your patronage of the merchants who are advertising in the Fairview Tower News will express your appreciation and help merit their continued support.

As is true of all newspapers, the life-blood of our paper and its continued publication is dependent upon money received from the sale of advertising space.

So What!

by Bruce McKinney

One of the most exciting experiences of life is taking a trip. Even a simple bus trip across town can be an adventure. It starts with rising suspense as you wait for the bus - "Will the bus get here before the frost bite reaches my hips?"

After you get on the bus, you can try to solve a few of the mysteries, such as "Why does the man have his hand caught in the coin box?" or "Who took the heat?"

Probably the most popular means of traveling today is flying. Now, some people are afraid to fly, so let me set them straight. There is not danger in flying. Of course, if you fly tourist class there are a few inconveniences, such as getting a seat between an airsick sailor and a mother changing her baby's diaper. Also aboard this flight, they show such reassuring movies as "The

So what! Also in the station, you can get a look at many different types of people; people such as Jesse James, Richard Kimble, members of group study tours, and Steve Wilson. Steve Wilson is a cool guy. So what!

'Midnight Blue' Review

by Doug Simon
Midnight Blue, an LP on Blue Note Records, by Kenny Burrell demonstrates this artist's guitar wizardry. Appearing with Burrell on this recording are Stanley Turrentine, tenor sax; Major Holly Jr., bass; Bill English, drums; and Ray Barretto, conga.

This album has a wonderful selection of the best of blues and jazz music, which Burrell plays so ably. Burrell and Turrentine work well together on this album and really put "soul" into these recordings.

Outstanding selections include "Chittlin's Con Carne", "Mule", and "Soul Lament".

This album is recommended for those who are guitar or sax enthusiasts, or to those who appreciate good blues or jazz music.

Tattlers Arrive

So Take Heed

by Sam and Andi
Beware! The Tattlers are here! Our purpose - to relay to you the choice tidbits which we have picked up around the school. In this, our first report, we had our ears to the wall in Mr. George Catterlin's room. Mr. Catterlin teaches world history.

Some pearls of wisdom heard: Did you know that "Queen Elizabeth was a very wise, good queen; so, she never married."

One young man expressed the difference between a president and a king as, "a king has no vice."

Do you geography students recall the temple in Athens called "The Pancreas"?

History students discovered after a test that Alexander the Great entered Troy disguised as "greese".

Think before you speak; you never know who may be listening.

by Art and Johnny

week, frenzy is always the order of the day.

Mrs. Culp, despite all this harried confusion, keeps cool. She is certainly an amazing woman (although one club president swears he saw her by seventeen cases of Alka Seltzer in a discount drug store).

Anyway, if you want to go "where the action is", try the group counseling office.

Off The Cuff

By Murray Horwitz

Many of us think about the so-called "roaring" Twenties, and many of us would like to have lived then. However, now, in the Sixties, we are experiencing the "roaring" Twenties, only on a much grander scale. The key to this grandeur, and that of the Twenties, is economic prosperity.

Today, we live in the midst of a prosperity that is almost unequalled in economic history. New lows are being reached in unemployment; simultaneously, new highs are being reached in per capita income and Gross National Product.

Why should the 1960's be years of prosperity? The best answer is that we are now realizing the results of wholly controlled national economics; during the years from 1953 to 1961, many of the New Deal-type economic proposals were discontinued, and the boom-recession-recovery business cycle was resumed.

Group Counseling A-Go-Go

Have you ever spent a day in the group counseling office? It's something else. We spend a lot of time there and get to see all of the weird things that go on.

It seems that any time anybody has nothing to do, he's in the group counseling office. No matter what it is, organizing a dance, putting a show together, or trying to get an unauthorized permit, it's all done in the group counseling office.

With the resumption of Government economic proposals at the end of this period, the return to controlled economics to American business suffered temporary setbacks, such as the stock market decline of 1962.

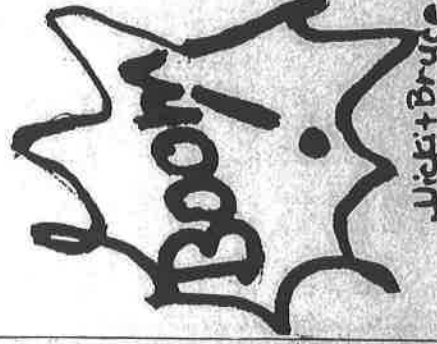

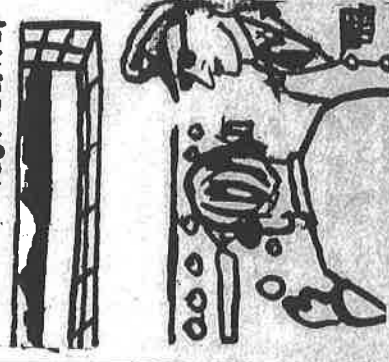

We are experiencing the results of that return today. How far can it go? With government regulation of business, it may be possible to have true prosperity without inflation. Since the advent of a government-regulated economic system in our country, no degree of peacetime prosperity thus far has ever equalled the one in which we are now living.

President Johnson and his advisers are now trying to keep our economy at this high level. With the built-in economic stabilizers that the government has implemented, such as wage and price controls, they might be able to succeed. It will be interesting to see them try.

Mrs. Dorothy Culp, group counselor, has an infinite number of problems, such as arranging the school calendar, Murray Horwitz, and finding her chair.

The office runs on one natural law: "Necessity is the mother of invention." People try to organize dances three weeks ahead of time, but somehow, they just don't seem to get started until three days before the event. There being at least one such event per

Atomic Test Center

Baseball Champs Fight To Retain City Title

FHS will open its baseball season on April 11, at Princeton Park. Northridge will supply the opposition for last year's City Champion Bulldogs.

The team finished with a 13-6 record last year.

Five members of this team were graduated; however, thirteen boys returned. There is also a good crop of reserves. A big bat returning will be that of Ralph Bechtolt. Ralph hit .310, led the team in RBI's with 20, and stole 16 bases, to lead in that department.

George Echko, used mostly as a pinch-hitter last year, will try for a starting berth in the outfield. Echko batted .360 and had 7 RBI's.

Others returning will be infielders Mike Schmidt, Lon Jackson, and Dale Sears; outfielders Dwight Woessner and Ron Messer; catcher Ron Neff; pitcher-outfielder Bill Wiemer-sluge; pitchers Jim Moland, Dave Dolph, John Pichler and Don Moshos.

Schedule Of Games

Fairview Tower News Doubleday Bats Ball For Fame

Abner Doubleday started baseball the summer of 1839 on a farm field in Coopers town, New York. Doubleday laid out the first baseball diamond and established the first rules of the game.

Of all the team sports baseball is one of the few in which neither size or height proves an advantage. Often the smaller men are the better players because of their speed.

The Cincinnati Red Stocking was the first professional baseball team organized. This event occurred in 1868.

The game of baseball caught on with the fans. However, a scandal which resulted from incidents which involved the acceptance of bribes by some of the players of the Black Sox team, almost finished the game.

But, with the brilliant playing of Babe Ruth, Bill Dickey, George Sisler, and many others, fans flocked to cheer their favorite players and heroes.

Baseball has had its great moments: Ty Cobb's 96 stolen bases in 1906, Babe Ruth's 60 homeruns in 1927, Bobby Thompson's pennant-winning homerun in the 1951 N.L. play off game, and Don Larsen's perfect game in the 1956 world series.

Each season has its high points and tension filled moments. It is not unusual to see a last place team like the Mets draw 50,000 to 60,000 people a day to see a ballgame.

Every decade produces its stars and outstanding players. From 1950-1960 they were Ted Williams, Mickey Mantle, Willie Mays, and Ernie Banks.

Today we have Maury Wills, Ron Santo, Billy Williams and Glenn Beckert. *From Abner Doubleday's small diamond on a farm-land lot to the Astrodome in Houston, baseball has grown to become one of the favorite pastimes of the American people.

Gymnasts Score Success With Excellent Season

Gymnastics is the newest and fastest growing sport at Fairview. This year, the FHS team had a successful season, ending with 18 wins, 1 loss, and 1 tie. The competition in which the team has been so successful includes work on the uneven parallel bars, balance beam, free exercise, trampoline, horse rings, high bar, and parallel bars.

Seniors Dee Dryden and Scott Kelso took honors at the Hamilton-Taft and Kettering Invitational Tournaments.

Dee Dee, who specializes on the balance beam, placed first out of 39 girls from 13 schools which participated in the meet at Hamilton-Taft.

Scott received the title of "First all-round gymnast" at the Kettering Invitational. In receiving this award Scott accumulated eighteen points.

On March 3, the team **Spring Brings Swing**

Of Clubs To FHS
 Tryouts for the Fairview High School golf team will begin this Monday, March 28, immediately after school.
 Mr. Philip Prather, science teacher and coach, has three veterans from last year's team, returning. They are Mark Vangrov, senior; Ted De Vilbiss, senior; and Tom Phillips, a sophomore.

Last year, the team finished with a 9-3 record and took second place in the city league.

Vangrov has the best average of the lettermen. He averages 39 strokes for 9 holes. De Vilbiss and Phillips average 42 for 9 holes.

Underclassmen Receive Praise At Their Respective Assemblies

Honored

Sophomores

On Monday, March 21, Mrs. Evelyn Rinehart, geometry teacher, supervised the Sophomore Honor Recognition assembly.

Student speakers, Carl Schwab, Marsha Pabst, Jerry Collett, and Shelly Kuhr spoke on "the responsibilities and privileges of scholastic attainment", the theme for the assembly.

Karen Rodberg sang a selection from Grease

Paint

Sophomores recognized at the assembly were Susan Fisler, Helene Kasavan, Linda Troester, Timothy Hale, Pamela Needham, Robert Godshall, Jennifer Lee, Daniel Miller, Jerry Collett, Carla Corrello, and David Kruegar.

Also Andrew Cogbill, Rochelle Kuhr, Carol Schwab, Cynthia Moeller, Harry Beyogdes, Cynthia Shilt, Melody Nugent, Vicki Holland, Karen Rodberg, Johanna Richardson, Sandra Rubin, George Goshing, Marilyn Lee, Diane Matthews, Jeri Feuer, Marsha

Bundman, Michael Kling, Bruce Guntner, Barbara Trick, Marcia Pabst, and David Bowers.

Honored Freshmen

This Monday, March 28, the Freshman honor students will be recognized at an assembly organized by Mrs. Frances Kehoe, Freshman English teacher. Rev. George Bowles, Director of Youth at Grace Methodist Church, will speak to Freshman and their parents at the assembly.

Students being honored are Donna Ashworth, Margo Jaffe, John Keeny, Alan Jacobs, Norma But-

ler, Carol Hall, Beverly Hime, David Kantor, Sue Raschke, Connie Schaefer, James Manion, Sandra Mayerson, Shelley Nierenberg, Howard Reed, Jena Ferguson, Joyce Martin, Sharen Swartz, Wayna Williams, Mindy Barrar, Michael Caplan, Heather Carroli, Jan Felman, James Greider, Deborah Jackson, William Klinger, Richard Lewellen, David Light, Pamela Mason, Donna Webb, and Marjorie Sinder.

There will be a coffee hour for honor students and their parents after the assembly.

Whiz Kids Win

On Teen Scene

On Saturday, March 5, at 12:00 p.m., the WLW-D "Whiz Kids" toppled Fairmont West. Under the direction of Miss Dorothy Herbst, English teacher, the team won by a score of 1700 to 1350.

The team, consisting of Dan Rappaport, Ron Remick, Pat Patterson, and Captain Murray Horwitz, was trailing Fairmont West by 150 points, going into the fourth round. They passed West to win the match. The next game is against Fairmont East, April 9, 12:00 p.m. on Channel 2.

Cont. from page 1
the arc will be about 7,500 watts.

When the plasma generator is operating it will be mounted inside a cement pipe which has mounted in the center of it an antenna, incarcerated in cement, for a radio signal generator. Experiments on broadcasting signals through the plasma that surrounds the antenna will be conducted. Many different frequencies will be tried.

The results of this experiment will be to determine those frequencies at which the signal received greatest-greatest. Magnetic fields may be employed in an effort to control the plasma, thereby producing favorable broadcasting conditions.

"If at first you don't succeed, try, try, again." Well, everybody, try to guess the subject to this photograph of a faculty member at FHS. Surely you must recognize this one!

Take a second look at the faculty (or maybe a first look?) You probably see this person every day! As in the previous contest, a "surprise prize" will be awarded to the winner.

If you think you have a correct answer, come to the Cola Cottage between

Council Comments

by Murray Horwitz

First of all, let us thank all of you who supported our calendar drive. It is not yet known whether we will have enough money to purchase air conditioners for the two study halls. As soon as we find out, however, we will let you know.

The presidents of the Colonel White, Meadowdale, and Fairview Student Councils, Barton Lev, Randy Solomon, and yours truly, have arranged tentatively for the re-organization of the Dayton Area Association of Student Councils. A meeting was held March 16, at Meadowdale, with presidents of student councils throughout the Miami Valley attending. The benefits of having such an organization are obvious; whereas one student council can do little in the community as a whole all the student councils together can do much.

Back at home, now, we are getting ready for the elections, to be held in May. Representatives are making homeroom lists to aid registration. Some of you ask us what constructive work Student Council does. Well, this is our biggest and most important contribution of the year, and it demands wholehearted co-operation on the part of the student body. It's not too early to start thinking seriously about running for an office for next year. This is a chance to help improve yourself by helping to improve your school. Think. Act.
